Program

- Cabins will be grouped together into cohorts – size will be dependent on % of campers vaccinated.
- Program will be developed by the cabins, based on group choice. For returners – think Quest, but with all the traditional camp activities as options.
- This program design will mean campers will be able to participate in a greater number of activities than in previous summers. With more activity choice comes less depth in each activity, so there will not be same level of skill development.
- We'll be eating in shifts in the Dining Hall, sitting by cabins/cohorts, with the building well ventilated.
- There will be lots of handwashing.
- Overnight Campers will only have to wear masks when they are inside a building with people outside of their own cohort – other than meals, this will not happen very often.
- We ask that you do not make any plans that require your camper to leave camp once the session has started.
- Please limit the number of packages sent to camp to one per week.

Pre-Arrival

- If your child is not vaccinated, plan to get a PCR test no more than 72 hours prior to check in, bring results to check in. Or an antigen if this is not possible.
- Track your child's temperature and signs for symptoms for the 2 weeks leading up to camp. Use this [form](#).
- On [CampInTouch](#) please complete your Bunk Request Form and check the grade we have on file under 'Camper Information'. These must be done at least 2 weeks prior to check in. We will be unable to make switches on check in day.
- As a family, do not participate in any high-risk activities in the 2 weeks prior to your child's session.
- Set up your Camp Store account, we will not be taking cash or credit cards in person on check in day.

Check In Day

- We will have staggered drop off times from 2:00-4:00pm. You'll get an email the week before camp with your time slot.
- Please limit the number of family members that come to camp.
- Masks will be requested for all and please adhere to social distancing while on camp.
- Parents are asked to not go in the cabins. The cabin will have time set aside to unpack and make beds later in the day, of course our staff will help out.
- You'll need to answer these [screening questions](#).
- Present either: A Vaccination Card; or a negative test, or a doctor's note stating your child is symptom free, but has been positive for COVID-19 in the last 90 days. If you don't have the test results, you'll be directed to a local testing center to get an antigen test.
- Don't forget your Medication Administration form if your child requires medications while at camp.
- Sorry – no Hazen Cookies this year.

Response to probable COVID-19 case

- Camper/Staff member will go to the Health Lodge to be assessed. If symptoms are of an unknown origin, campers will be required to be picked up within 12 hours of notification to be taken for a COVID-19 test.
- Families of other campers in the cohort will receive an email to inform them of a suspected case. Program will be modified for these campers.
- If the test comes back positive all members of the cohort will be required to be picked up within 12 hours of notification.
- Vaccinated Campers & Staff will not be required to quarantine, unless symptomatic.
- If you are sent home from camp for this reason you will be pro-rate a camp credit for 2022.
